Orange County's first post-pandemic high school hackathon.

Hack OC

Sponsorship Prospectus

Hack OC

What is Hack OC?

We're a group of high school students that's passionate about programming. After attending our first in-person hackathon, we knew we wanted to help bring that magical experience of learning, creating, and connecting to as many people as possible. **Coding is a superpower** that allows people to think, innovate, and build anything. Hack OC is our way of sharing it with the world: a **12-hour, 100-person IRL coding event.**

It's been **seven years** since Orange County's last high school hackathon. It's time for another.

Why sponsor Hack OC?

Sponsorships are **vital** to the success of Hack OC. By sponsoring, you help fund a magical experience for the future generation of innovators and hackers. You'll also be able to market your product to an intruiged audience of high school hackers.

How you can help

- **Monetary sponsorship:** Directly giving us money helps us cover all of our hackathon expenses: meals, venue, prizes, snacks, swag, and more. It's the best way to support Hack OC.

- **Mentors, judges, and speakers:** Hack OC will be the first programming experience for many people. If you know someone awesome, send them our way! Attendees would be able to meet and ask technical questions.

- **In-kind support:** Comapny swag, prizes, workshops, and product access can all help enhance the event and are greatly appreciated.

- **Anything we missed?** If you have other ways you can help out, we'd like to hear! You can reach us at **team@hackoc.org**.

Sponsorship perks

We can work out the sponsorship amount over email or on a call, but some benefits can include:

- **Logo and branding** on website, promotional material, shirts, and more

- **Email communication** to all attendees

- **Workshops & booth** IRL at the event

- **Dedicated channel** on our Discord server

- **Opening and closing ceremony talks**

- **Swag & prizes** distributed to attendees
